Large order for Interroll's Modular Conveyor Platform from Korea

Sant'Antonino, Switzerland, June 12, 2018. Interroll today announced that it has received a large order from a Korean E-Commerce company, worth in the lower double-digit million CHF range for a large-scale delivery of Interroll's Modular Conveyor Platform (MCP) as well as its Spiral Lifts.

Interroll will deliver and install a record number of conveyor modules covering a total length of 12 km as well as eight Spiral Lifts destined for the customer's distribution center located in South Korea. Interroll is fully committed to enable the customer's go-live within an ambitious timeline by strengthening infrastructure capacities to cope with the upcoming peaks during the Korean mid-autumn festival and Christmas season. Completion of all installations is scheduled within 2018. This new order is another business for Interroll after a previous redesign of one of the same customer's distribution centers in 2017.

"Interroll Korea did an excellent job in building up an extremely successful cooperation to move this project forward. For this large-scale project, the full support of our Center of Excellence in China will be available," says Dr. Ben Xia, Executive Vice President and member of Group Management Head of Operations Asia at the Interroll Group. "We are very much looking forward to enabling our customer's logistics with state-of-the-art solutions for their material flow."
