

Interroll's new plant in Thailand fully operational

Sant'Antonino, Switzerland/Bangkok, Thailand, September 9, 2019. Interroll (Thailand) Co., Ltd. has moved to a new, state-of-the-art plant in Phantong (Chonburi) in order to seize growth opportunities in Southeast Asia.

Interroll Thailand has completed its relocation to a new location in Phantong (Chonburi) which provides a shop floor of more than 4,800 square meters as well as a 700-square-meter office space in attractive Interroll design.

The construction of the new plant in Thailand is an important part of Interroll's consistent globalisation strategy. Growth markets in Southeast Asia—especially Indonesia, Philippines, Vietnam and Myanmar—show a good demand for Interroll products, with significant potential for the long-term future. Moreover, an increase in the base of installed material handling systems in the region provides additional opportunities for services in the region.

“We are running a state-of-the-art location with improved capacities here,” says Grisorn Nakapong, Managing Director of Interroll Thailand. “The locally manufactured products are Rollers, RollerDrive, Pallet Flow, and Drum Motors service. Our customers can also count on upgraded Drum Motor services, which we provide at this location.”

Increased productivity and shorter delivery times

By the end of 2019, a production line for the Modular Conveyor Platform (MCP) will be added. Moreover, the container loading area has been laid out to support big orders of Pallet Flow for markets in Southeast Asia. The facility also provides an in-house canteen for the employees as well as multipurpose areas for sports and team building activities. Modern office concepts facilitate communication among employees and within project teams.

“By introducing product lines with One Piece Flow and a high degree of automation, we have further raised our productivity significantly,” says Jens Strüwing, Executive Vice President Products & Technology at Interroll. “The new plant enables us to shorten delivery times for our customers in the region by 30 to 50 percent and to produce a much larger range of our solutions in proximity to our Southeast Asian target markets.”
