

Interroll broadens scope of solutions for the retail sector

Sant'Antonino, Switzerland, February 17, 2020. On the occasion of the EuroShop 2020 in Düsseldorf, Interroll announces the rebrand of its Center of Excellence (CoE) in Denmark as the Commercial Belt Drives & Conveyors, effective March 1, 2020. The decision underscores the fact that Interroll's overall portfolio is very suitable for both supermarket and retail applications.

Today, six out of ten checkout stands in supermarkets and retail stores worldwide are powered by Interroll. Making a significant contribution to this success has been the Interroll Center of Excellence in Hvidovre, Copenhagen, Denmark, which to date has concentrated on drum motors and cassettes used as belt drives in checkouts and reverse vending machines for supermarkets.

As of March 1, 2020, Interroll will rebrand the location in Denmark as the CoE Commercial Belt Drives & Conveyors. The distinction "commercial" stands for the difference from drum motors used in industrial (food processing and manufacturing) applications. The CoE will be responsible within the global Interroll Group for all technical concerns related to conveyors used in commercial settings, ranging from development and application engineering to production and support for local Interroll entities.

"With regards to supermarket, retail and omnichannel, customers have a need for lighter-duty, lean and cost-effective material handling solutions," says Anders Staf Hansen, Managing Director of Interroll Denmark. "Besides the increasingly complex material handling processes at stores themselves, there is also a general need to cover the entire material flow in factories and distribution centers that are linked with the retail sector. As the world's leading provider of material handling solutions, we will put an even stronger emphasis on such processes."

At the EuroShop 2020—scheduled for February 16–20 at Messe Düsseldorf—Interroll will exhibit a complete cashier system with drum motor, cassette and Softstart Control at Hall 14, Booth A 20.

About Interroll

The Interroll Group is a leading global provider of material handling solutions. The company was founded in 1959 and has been listed on the SIX Swiss Exchange since 1997. Interroll provides system integrators and OEMs with a wide range of platform-based products and services in these categories: “Rollers” (conveyor rollers), “Drives” (motors and drives for conveyor systems) and “Conveyors & Sorters”, as well as “Pallet & Carton Flow” (flow storage systems). Interroll solutions are used in express and postal services, e-commerce, airports, the food and beverage industry, fashion, and automotive sectors, and many other manufacturing industries. Among the end users are leading brands such as Amazon, Bosch, Coca-Cola, DHL, Nestlé, Procter & Gamble, Siemens, Walmart and Zalando. Headquartered in Switzerland, Interroll has a global network of 32 companies with sales of CHF 559.9 million and around 2,300 employees (end of 2018).
