

# PRESS RELEASE

## **Interroll to deliver highly efficient crossbelt sorters to Swiss reference customer**

**Sant'Antonino, Switzerland, April, 3, 2019. Interroll received a large follow-up order from Siemens Postal, Parcel & Airport Logistics (SPPAL) for the delivery of five crossbelt sorters. The fully automated, high-performance sorting system will be installed in the existing system infrastructure of a Swiss reference customer.**

The increasing demand in e-commerce is driving a steady increase in mail volumes around the world and presenting many postal companies with new challenges. This particularly applies to processing and sorting the rapidly increasing numbers of smaller parcels with different packaging, sizes and weights.

To flexibly and efficiently meet this challenge as a general contractor, Siemens Postal, Parcel & Airport Logistics (SPPAL) was called upon to deliver the latest conveyor and sorting technology, as well as software solutions for a mail center in the Zurich area.

"The new order is now building on the many years of successful collaboration between Siemens Postal, Parcel & Airport Logistics and Interroll in Switzerland," says Martin Resch, CEO of Siemens Postal, Parcel & Airport Logistics AG in Switzerland.

"We are looking forward to continuing our contribution to the performance and flexibility of postal companies in the future, thanks to our reliable and flexible sorter solutions in collaboration with Siemens," says Jörg Mandelatz, Managing Director at Interroll Fördertechnik GmbH.

For fully automated sorting processes in the market of courier, parcel and express postal service providers, Interroll offers horizontal and vertical sorters. With a curve radius that can be reduced to as little as 2.5 meters, Interroll's range also includes particularly space-saving sorter solutions. The new infeed modules from Interroll, which offer a substantial potential increase in goods flow from automatic sorting systems thanks to optimal configurable infeed speeds, also stand out thanks to their low space requirements.

## Interroll profile

The Interroll Group is the leading global provider of material flow solutions. The company was founded in 1959 and has been listed on the SIX Swiss Exchange since 1997. Interroll supplies system integrators and plant manufacturers with a wide range of platform-based products and services in the following categories: "Rollers" (conveyor rollers), "Drives" (motors and drives for conveyor systems), "Conveyors & Sorters" and "Pallet & Carton Flow" (flow storage systems). Solutions from Interroll are used in express and postal services, in e-commerce, in airports, in the food and beverage, fashion and automotive sectors, and in many other industries. The company is used by leading brands such as Amazon, Bosch, Coca-Cola, DHL, Nestlé, Procter & Gamble, Walmart and Zalando. Headquartered in Switzerland, Interroll has a global network of 32 companies with turnover of around CHF 559.9 million and 2300 employees (as of 2018).
