Product description

The roller conveyor curves change the direction of transport of the material. The alignment of the material is maintained within the side frames by tapered rollers. The flat belt-driven curve is driven either by an adjacent straight module or by a separate head drive. Accumulation mode is not possible in powered 400/460-V curves.

Scope of delivery

- Supply incl. 1 sensor
- Module is completely assembled, except for the flat belt
- Please order supports and end caps separately
